## Industrial Products, Households, and Green Energy Recycling

**Industrial Surfactants**

- Eco-friendly industrial surfactants
- Long operation history and strong customer base
- We will continue to lower the production costs by means of production of industrial enzymes and development of substitute materials

**Household Products**

- We regularly introduce new products to address more sophisticated customer needs
- Cost increase in major raw materials and keen market competition
- We will maintain our market share in this segment

**Industrial Enzymes**

- Years of R&D collaboration with University of Hong Kong and grant from Innovation and Technology Fund of HKSAR
- Production facility construction started in 2005, completed in 2007
- Awarded First Prize Advanced Technology by Dongguan Government in 2007

**Green Energy Waste-to-oil**

- Integrated, innovative and proven technology, transforming waste tyres and plastics into high-grade energy products
- Patented technology in PRC, applying for the patent in many other countries
- Successfully obtained from Hong Kong Government for granting a site of 24,000 square metres at a very low price in Yuen Long to set up energy recycle business
